* If NIH due date falls on a weekend or a holiday, please extend to the next business day and adjust internal due dates accordingly

**Please note: any submissions for January and February will require even more advance notice due to the University winter break in December.

* The move to electronic applications also has brought a change in terminology. The new Grants.gov terminology (included in the table above) corresponds to traditional NIH terms as follows:

- New = new
- Resubmission = a revised or amended application
- Renewal = Competing Continuation
- Continuation = Noncompeting Progress Report
- Revision = Competing Supplement

At present NIH receives and processes applications for NIOSH and also for components of CDC that participate in the Omnibus Solicitation for Small Business Innovation Research grant applications. This notice applies only to these two groups of applications and not to other CDC submissions.

The following resources continue to be available for assistance in the electronic submission of grant applications to NIH/A <http://grants.gov/>
